

String

08 June 2025 09:09

A String in java is an Class that represent a sequence of characters

How to create String object

1. Using literal
2. Using new keyword

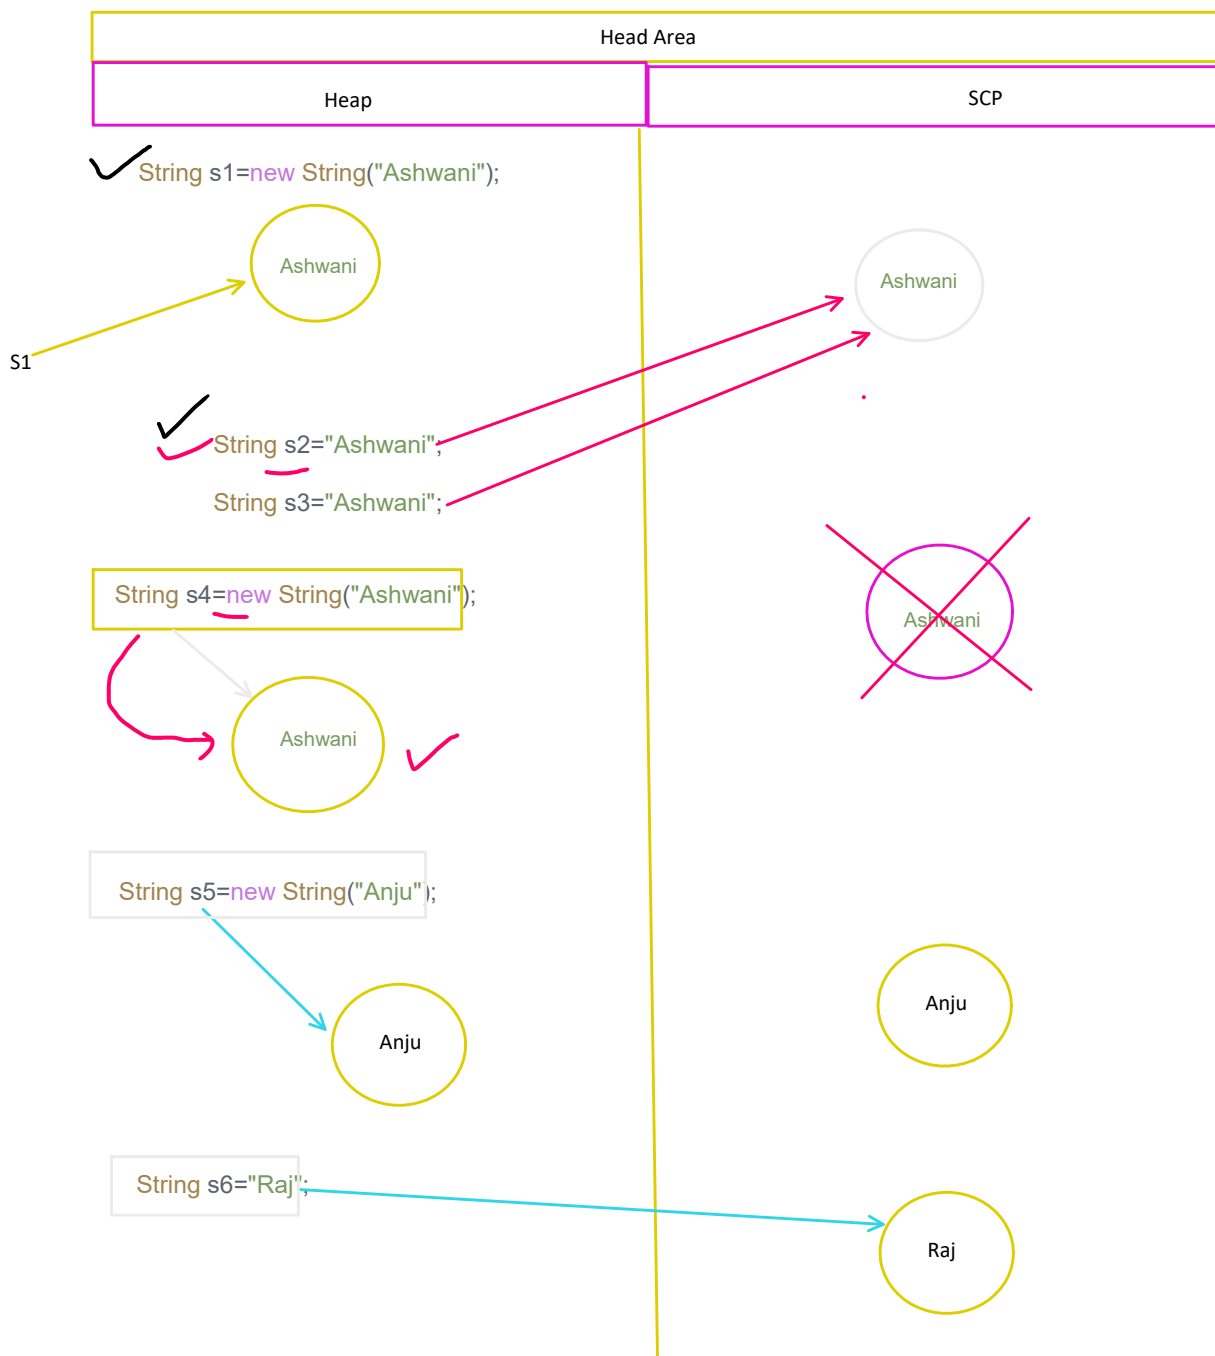

String name = "Ashwani" ; // String literal (recommended)

String name = new String("Ashwani");

== -> in case of primitive it compare values

== -> in case non primitive it compare reference

.equals()

What is immutable ?
Cannot be changed after creation

```
public class ImmutableDemo {  
    public static void main(String[] args) {  
        String s1=new String( original: "Java");  
        String s2 = s1.concat( str: "full stack");  
        System.out.println(s1 == s2);  
    }  
}
```

Why String is Immutable ?
We mostly use String in development and we use string for storing username, password, of db

Example 1

```
String password ="123444"  
Password.concat("238203");
```

Example 2

String userData= " name, prefernce, location"

Preference --> babu

String use in Caching

Example 3

```
String s1=new String("Ashwani"); //hashcode --> 8687878  
S1.concat("upadhyay");
```

Shivendra Pandey 10:02
Is the object name is same then also differnt object is created?

```
String s1=new String("Java");  
s1= s1.concat("full stack");
```

```
String s1 = "java"
String s2 = s1.concat("fullstack");
```

S1 -- scp --- literal
S2 --

Java --- scp
Fullstack -- scp
Javafullstack --- heap

Questions 1

1. String s1 = "java"
2. String s2 = "java"

Answers :

SCP	1
Heap	0

Question 2

```
String s1 = new String("java");
String s1 = new String("java");
```

Answer:

SCP	1
Heap	2

Questions 3:

```
String s1 = "java"
String s2 = "java"
String s3 = new String("java");
```

Answer:

SCP	1
Heap	1
Total	2

Questions 4:

```
String s1 = "hello"
String s2 = "world"
```

String s3 = s1+ s2;

Answer:

SCP	2
Heap	1

Questions 5

String s1 = "java"

String s2 = new String("java").intern();

Answer:

SCP	1
Heap	1

1.5

1. StringBuffer --> mutable, Thread safe , slow
2. StringBuilder -> mutable , Not Thread safe , faster

Features:	String	StringBuffer	StringBuilder
Mutable			
Thread - safe			
Fast	Medium	Slow	Very Fast
Use case	Password, connection When you required immutability	When we required thread safty	When you required frequent modification

Q1 : Reverse String

String s="abhishek";

0	1	2	3	4	5	6	7
A	B	H	I	S	H	E	k

Q2: Question : Count vowels and consonants

a, e, l , o u

Eg: Ashwani

V= 3

C= 4

Q3: check if string is palindrome

Eg: madam

121

Q4: Capitalize first letter of string

Eg: java full stack

o/p: Java Full Stack

Q5: remove duplicate char from string

Eg aabcd

o/p: abcd

Q6: check string is anagram
